

createAssembleHtmlTool

September 5, 2026

createAssembleHtmlTool

Kind: Function

Source: `atloria-monorepo/libs/pme-core/src/tools/assemble-html.tool.ts`

Create the `assemble_html` tool.

Accepts a `storeFn` so it can auto-store the generated HTML and return only a summary

(avoids sending 30K+ chars back through the agent loop which causes API timeouts).

Signature

```
function createAssembleHtmlTool(storeFn: StoreAssetFn, config: GenerationConfig): ToolDefinitio
```

Parameters

Name	Type
<code>storeFn</code>	<code>StoreAssetFn</code>
<code>config</code>	<code>GenerationConfig</code>

Returns: `ToolDefinition<PmeContext>`
