

createTenantBackstop

September 4, 2026

createTenantBackstop

Kind: Function

Source: `atloria-monorepo/libs/database/src/lib/tenant-backstop.ts`

Build the extension config object to pass to `prisma.$extends(...)` . Kept as a plain factory (no

Prisma import) so it is trivially unit-testable with a fake `query` .

Signature

```
function createTenantBackstop(options: TenantBackstopOptions)
```

Parameters

Name	Type
<code>options</code>	<code>TenantBackstopOptions</code>
