describeItems

Kind: Function

Source: [atloria-monorepo/libs/parser-core/src/openapi/param-source-inference.ts](https://github.com/atloria-monorepo/libs/parser-core/src/openapi/param-source-inference.ts)

Locate the array of records in a response schema and describe how to read it.
Returns null when the response is not a list of objects — a scalar or a single record has
no candidate values to offer.

Signature

```
function describeItems(schema: SchemaLike | undefined, components: Record<string, SchemaLike>):
```

Parameters

Name	Type
schema	`SchemaLike
components	Record<string, SchemaLike>

Returns: `{ itemsPath: string; item: SchemaLike } | null`
