

detectLaravelUpload

September 4, 2026

detectLaravelUpload

Kind: Function

Source: [atloria-monorepo/libs/parser-core/src/openapi/multipart.ts](#)

Laravel: `$request->file('avatar')` , an `UploadedFile` type hint, or a validation rule that says `file / image / mimes . rules` is the form-request/validate() rule text when resolved.

Signature

```
function detectLaravelUpload(handler: string, rules): MultipartBody | undefined
```

Parameters

Name	Type
handler	string
rules	any

Returns: `MultipartBody | undefined`
