detectModalTriggers

Kind: Function

Source: `atloria-monorepo/libs/parser-core/src/utils/semantic-detector.ts`

Detect modal/dialog trigger methods

Finds methods that open modals/dialogs based on:

- Method names ending with "Prepare"
- Calls to `openPopup`, `showDialog`, `openModal`

Signature

```
function detectModalTriggers(code: string): string[]
```

Parameters

Name	Type
<code>code</code>	<code>string</code>

Returns: `string[]`
