evaluateVisibility

Kind: Function

Source: `atloria-monorepo/apps/api/src/reader-access/visibility.util.ts`

THE evaluator: does a reader with `attrs` see content guarded by `rule` ?
`rule` is the raw JSON from Document/Category.visibilityRule (untrusted shape).

Signature

```
function evaluateVisibility(rule: unknown, attrs: ReaderAttrs | null | undefined): boolean
```

Parameters

Name	Type
<code>rule</code>	<code>unknown</code>
<code>attrs</code>	<code>`ReaderAttrs</code>

Returns: `boolean`
