extractHowTo

Kind: Function

Source: [atloria-monorepo/apps/web/src/lib/structured-data.ts](https://github.com/atloria-monorepo/apps/web/src/lib/structured-data.ts)

A page is a HowTo when its type says "procedure" AND it really has ≥ 2 numbered steps. Each step's image is the first image between it and the next step — exactly how the generator interleaves them.

Signature

```
function extractHowTo(markdown: string, title: string, pageType: string | null | undefined): Ho
```

Parameters

Name	Type
markdown	string
title	string
pageType	`string

Returns: `HowToSchema` | `null`
