extractRubyControlFlow

Kind: Function

Source: `atloria-monorepo/libs/parser-core/src/parsers/backend/ruby-control-flow.ts`

Read the guards and handlers out of Ruby source, or out of one method of it.

`startLine` / `endLine` are inclusive 1-based file lines, so an action can be read on its own while the reported line numbers stay the file's.

Signature

```
function extractRubyControlFlow(source: string, startLine, endLine): ControlFlow
```

Parameters

Name	Type
<code>source</code>	<code>string</code>
<code>startLine</code>	<code>any</code>
<code>endLine</code>	<code>any</code>

Returns: `ControlFlow`
