extractSwaggerDocs

Kind: Function

Source: `atloria-monorepo/libs/parser-core/src/parsers/backend/nestjs-swagger-docs.ts`

Everything `@nestjs/swagger` decorators state about one operation.

Controller-level decorators are passed too — `@ApiTags` is conventionally written once on the

class — and method-level values win, which is the precedence NestJS itself applies.

Signature

```
function extractSwaggerDocs(methodDecorators: readonly ts.Decorator[], controllerDecorators: re
```

Parameters

Name	Type
<code>methodDecorators</code>	<code>readonly ts.Decorator[]</code>
<code>controllerDecorators</code>	<code>readonly ts.Decorator[]</code>

Returns: `AuthoredDocs`
