findSectionRange

Kind: Function

Source: [atloria-monorepo/apps/web/src/components/change-requests/section-merge.ts](https://github.com/atloria-monorepo/apps/web/src/components/change-requests/section-merge.ts)

Find the [start, end) line range of the section in `lines`, or null when the heading is not present.

Signature

```
function findSectionRange(lines: string[], heading: string, level: number): { start: number; end: number } | null
```

Parameters

Name	Type
<code>lines</code>	<code>string[]</code>
<code>heading</code>	<code>string</code>
<code>level</code>	<code>number</code>

Returns: `{ start: number; end: number } | null`
