flowKey

Kind: Function

Source: [atloria-monorepo/apps/screenshot-worker/src/app/screenshot/services/crop.service.ts](#)

Deterministic storage key for a flow step screenshot.

Naming scheme (WS-A flow-replay):

`flowKey('abc', 0) => 'flows/abc/step-0.png'` (initial state, full page)

`flowKey('abc', 2) => 'flows/abc/step-2.png'` (state after step 2, full page)

`flowKey('abc', 2, 'crop') => 'flows/abc/step-2-crop.png'` (tight crop around the target)

The no-variant key is the canonical FULL-PAGE image the docs reference (it is the one the annotation fragment's coordinates are computed against). 'crop' is an auxiliary tight close-up. 'full' is retained for backward compat.

Signature

```
function flowKey(flowId: string, stepOrder: number, variant: 'full' | 'crop'): string
```

Parameters

Name	Type
<code>flowId</code>	<code>string</code>
<code>stepOrder</code>	<code>number</code>
<code>variant</code>	<code>'full'</code>

Returns: `string`
