formatNumber

Kind: Function

Source: [atloria-monorepo/apps/web/src/components/Analytics/charts/formatters.ts](https://github.com/atloria-monorepo/apps/web/src/components/Analytics/charts/formatters.ts)

Number / duration / percent formatters shared across all chart primitives.
Kept tiny on purpose — no Intl.NumberFormat instances created on every render.

Signature

```
function formatNumber(value: number | null | undefined): string
```

Parameters

Name	Type
value	`number

Returns: string
