formatRehydrationItems

Kind: Function

Source: [atloria-monorepo/libs/agent-core/src/context/rehydration.ts](https://github.com/atloria-monorepo/libs/agent-core/src/context/rehydration.ts)

Format rehydration items as synthetic tool output for injection into the conversation. Each file becomes a synthetic read_file result.

Signature

```
function formatRehydrationItems(items: RehydrationItem[]): string
```

Parameters

Name	Type
items	RehydrationItem[]

Returns: string
