generateWorkflowDocumentation

Kind: Function

Source: `atloria-monorepo/libs/parser-core/src/generators/workflow-documentation.generator.ts`

Generate workflow documentation from enhanced screenshot metadata

Takes a collection of screenshots with state machine context and creates comprehensive workflow documentation including state diagrams, actions, and guides.

Signature

```
function generateWorkflowDocumentation(screenshots: EnhancedScreenshotMetadata[], options: Work
```

Parameters

Name	Type
<code>screenshots</code>	<code>EnhancedScreenshotMetadata[]</code>
<code>options</code>	<code>WorkflowDocGenerationOptions</code>

Returns: `WorkflowDocumentation[]`
