getLayout

Kind: Function

Source: `atloria-monorepo/libs/pme-core/src/tools/layouts/registry.ts`

Get a layout renderer. Falls back to the first registered layout (the default) if the key is not found.

Signature

```
function getLayout(sectionType: string, layoutKey: string): SectionRenderer | undefined
```

Parameters

Name	Type
<code>sectionType</code>	<code>string</code>
<code>layoutKey</code>	<code>string</code>

Returns: `SectionRenderer | undefined`
