

hourBucketStart

September 4, 2026

hourBucketStart

Kind: Function

Source: [atloria-monorepo/apps/api/src/analytics/utils/tracking-utils.ts](https://github.com/atloria-monorepo/apps/api/src/analytics/utils/tracking-utils.ts)

Compute the start of the hour bucket containing `date`. Used by the session-dedup logic in the analytics service so that multiple page-view beacons from the same session+slug within the same hour collapse into a single row instead of stacking up.

Signature

```
function hourBucketStart(date: Date): Date
```

Parameters

Name	Type
<code>date</code>	<code>Date</code>

Returns: `Date`
