isBot

Kind: Function

Source: `atloria-monorepo/apps/api/src/analytics/utils/tracking-utils.ts`

Returns true if the given user-agent string looks like a bot/crawler/automation tool. Empty strings are treated as bots — a real browser always sends a UA.

Signature

```
function isBot(userAgent: string | null | undefined): boolean
```

Parameters

Name	Type
<code>userAgent</code>	<code>`string</code>

Returns: `boolean`
