

isEligibleForAuto

September 4, 2026

isEligibleForAuto

Kind: Function

Source: `atloria-monorepo/packages/tour-widget/src/targeting.ts`

Is this experience eligible to AUTO-show right now? Considers only client-side state — URL/segment matching was already done server-side, so a present experience is on-page by definition.

Rules:

- trigger.mode must be 'auto' (beacon/launcher are user-initiated).
- a completed or dismissed experience never re-auto-shows.
- an answered NPS never re-shows.
- firstVisitOnly ⇒ only for a brand-new visitor's first session.
- maxShows caps the number of auto-appearances.

Signature

```
function isEligibleForAuto(exp: WidgetExperience, state: WidgetState): boolean
```

Parameters

Name	Type
exp	WidgetExperience
state	WidgetState

Returns: `boolean`
