mergeEvalResults

Kind: Function

Source: [atloria-monorepo/libs/agent-core/src/benchmark/swebench-evaluator.ts](https://github.com/atloria-monorepo/libs/agent-core/src/benchmark/swebench-evaluator.ts)

Merge Docker harness evaluation results back into TaskResult objects.

Updates `passed` field based on official harness resolution status.

Signature

```
function mergeEvalResults(taskResults: TaskResult[], evalResults: EvalResult[]): TaskResult[]
```

Parameters

Name	Type
<code>taskResults</code>	<code>TaskResult[]</code>
<code>evalResults</code>	<code>EvalResult[]</code>

Returns: `TaskResult[]`
