normalizePlaygroundOAuth2

Kind: Function

Source: `atloria-monorepo/apps/api/src/project/playground-oauth2-input.ts`

Validate an owner's OAuth2 declaration and return what to store, or null to clear it.

Throws `BadRequestException` with a message meant for the owner, not for a log line.

Signature

```
function normalizePlaygroundOAuth2(input: unknown, current: PlaygroundOAuth2Config | null): Pla
```

Parameters

Name	Type
<code>input</code>	<code>unknown</code>
<code>current</code>	<code>PlaygroundOAuth2Config</code>

Returns: `PlaygroundOAuth2Config | null`
