operationCodeSamples

Kind: Function

Source: `atloria-monorepo/libs/parser-core/src/openapi/code-samples.ts`

Samples for a single operation; [] on any failure (never throws into the spec build).

Signature

```
function operationCodeSamples(spec: any, path: string, method: string, targets: string[]): Code
```

Parameters

Name	Type
<code>spec</code>	<code>any</code>
<code>path</code>	<code>string</code>
<code>method</code>	<code>string</code>
<code>targets</code>	<code>string[]</code>

Returns: `CodeSample[]`
