parseEnrichmentContent

Kind: Function

Source: `atloria-monorepo/apps/api/src/technical-docs/technical-docs-materializer.service.ts`

Parse an AI_ENRICHMENT Document's MDX (written by TechnicalDocsEnrichmentService — a fingerprint comment, then `### Description / ### Diagram / ### Usage Example /

**AI Coding Instructions` sections) into the EntityEnrichment shape
renderEntityPage**

merges. Server-side twin of the web entity page's fingerprint-strip + section renderer.

Signature

```
function parseEnrichmentContent(content: string): EntityEnrichment | null
```

Parameters

Name	Type
content	string

Returns: `EntityEnrichment | null`
