parseEvalResults

Kind: Function

Source: `atloria-monorepo/libs/agent-core/src/benchmark/swebench-evaluator.ts`

Parse evaluation results from the harness output.

The harness writes results to `{run_id}/results.json` with format:

```
{
  "instance_id": {
    "resolved": true|false,
    "tests_status": { "FAIL_TO_PASS": {...}, "PASS_TO_PASS": {...} }
  }
}
```

Signature

```
function parseEvalResults(resultsDir: string): EvalResult[]
```

Parameters

Name	Type
<code>resultsDir</code>	<code>string</code>

Returns: `EvalResult[]`
