parseIssues

Kind: Function

Source: [atloria-monorepo/libs/agent-core/src/autonomous/confidence-filter.ts](https://github.com/atloria-monorepo/libs/agent-core/src/autonomous/confidence-filter.ts)

Parse scored issues from agent output text.

Tries line-format first (one issue per line), then falls back to JSON array.

Returns empty array if neither format is found.

Signature

```
function parseIssues(agentOutput: string, agentName: string): ScoredIssue[]
```

Parameters

Name	Type
agentOutput	string
agentName	string

Returns: ScoredIssue[]
