

parseScopeLines

September 4, 2026

parseScopeLines

Kind: Function

Source: [atloria-monorepo/apps/web/src/app/app/projects/\[id\]/technical-docs/components/Playground0Auth2Config.tsx](#)

One scope per line: the scope, then anything after the first space is its description.

Signature

```
function parseScopelines(text: string): Record<string, string>
```

Parameters

Name	Type
text	string

Returns: `Record<string, string>`
