

pickAutoExperience

September 4, 2026

pickAutoExperience

Kind: Function

Source: [atloria-monorepo/packages/tour-widget/src/targeting.ts](https://github.com/atloria-monorepo/packages/tour-widget/src/targeting.ts)

The single experience the orchestrator should auto-present, if any: the highest-priority eligible one (the server pre-sorted by priority, so we keep that order and take the first eligible). Announcements/NPS/checklists and tours all compete on the same priority axis; one at a time.

Signature

```
function pickAutoExperience(experiences: WidgetExperience[], state: WidgetState): WidgetExperie
```

Parameters

Name	Type
experiences	WidgetExperience[]
state	WidgetState

Returns: `WidgetExperience` | `null`
