preprocessMarkdown

Kind: Function

Source: [atloria-monorepo/apps/web/src/components/Viewer/preprocessMarkdown.ts](https://github.com/atloria-monorepo/apps/web/src/components/Viewer/preprocessMarkdown.ts)

Preprocess markdown content to handle custom JSX components
Converts JSX-style components to HTML that ReactMarkdown can handle

Signature

```
function preprocessMarkdown(content: string): string
```

Parameters

Name	Type
content	string

Returns: string
