redactStepValue

Kind: Function

Source: [atloria-monorepo/apps/api/src/capture/capture.redact.ts](#)

Redact a single step's `value` in place-safe (returns a new value string or undefined). Applies to input/submit actions only.

Signature

```
function redactStepValue(step: {  
  action?: string;  
  value?: string;  
  selector?: string;  
  elementRole?: string;  
  elementText?: string;  
}): string | undefined
```

Parameters

Name	Type
<code>step</code>	<code>{</code>
<code>action?: string;</code>	
<code>value?: string;</code>	
<code>selector?: string;</code>	
<code>elementRole?: string;</code>	
<code>elementText?: string;</code>	
<code>}</code>	

Returns: string | undefined
