responsesForShape

Kind: Function

Source: [atloria-monorepo/libs/parser-core/src/openapi/response-shape.ts](https://github.com/atloria-monorepo/libs/parser-core/src/openapi/response-shape.ts)

The OpenAPI responses object for a classified shape.

Every branch states something true. `manual` is the interesting one: it publishes a described

200 with NO content schema, which says "there is a response and we could not describe it" —

distinct both from a fabricated schema and from an operation that documents nothing at all.

Signature

```
function responsesForShape(shape: ResponseShape): Record<string, unknown>
```

Parameters

Name	Type
shape	ResponseShape

Returns: `Record<string, unknown>`
