rewriteSampleHosts

Kind: Function

Source: `atloria-monorepo/apps/api/src/technical-docs/spec-server-overlay.ts`

Repoint `x-codeSamples` at the configured base URL.

Rewrites only the generated placeholder, so a project whose samples already carry a real host keeps them.

Signature

```
function rewriteSampleHosts(paths: unknown, baseUrl: string): unknown
```

Parameters

Name	Type
<code>paths</code>	<code>unknown</code>
<code>baseUrl</code>	<code>string</code>

Returns: `unknown`
