runWithRetry

Kind: Function

Source: `atloria-monorepo/libs/agent-core/src/benchmark/retry-runner.ts`

Run a benchmark task with retries, picking the best result.

Signature

```
async function runWithRetry(task: BenchmarkTask, runOnce: (task: BenchmarkTask, temperature?: number) => Promise<TaskResult>, config: RetryConfig, log: (msg: string) => void): Promise<RetryResult>
```

Parameters

Name	Type
task	BenchmarkTask
runOnce	(task: BenchmarkTask, temperature?: number) => Promise<TaskResult>
config	RetryConfig
log	(msg: string) => void

Returns: `Promise<RetryResult>`
