saveDocumentation

Kind: Function

Source: `atloria-monorepo/apps/cli/src/utils/screenshot-storage.helper.ts`

Save documentation with storage helper

Signature

```
async function saveDocumentation(documentation: {  
  title: string;  
  slug: string;  
  content: string;  
  categoryPath: string[];  
  type: 'user-docs' | 'tutorial' | 'feature';  
  metadata?: Record<string, unknown>;  
, storage: StorageHelperService, aiModel: string): Promise<{ id: string; url: string }>
```

Parameters

Name	Type
documentation	{

```
title: string;  
slug: string;  
content: string;  
categoryPath: string[];  
type: 'user-docs' | 'tutorial' | 'feature';  
metadata?: Record<string, unknown>;
```

```
} | | storage | StorageHelperService | | aiModel | string` |
```

Returns: `Promise<{ id: string; url: string }>`
