scimError

Kind: Function

Source: `atloria-monorepo/apps/api/src/scim/scim.constants.ts`

Build a SCIM error response body (RFC 7644 §3.12). `status` is a STRING per the spec. `scimType` narrows client behavior (e.g. 'uniqueness' on a 409).

Signature

```
function scimError(status: number, detail: string, scimType: string): { schemas: string[]; deta
```

Parameters

Name	Type
<code>status</code>	<code>number</code>
<code>detail</code>	<code>string</code>
<code>scimType</code>	<code>string</code>

Returns: `{ schemas: string[]; detail: string; status: string; scimType?: string }`
