seedTemplates

Kind: Function

Source: [atloria-monorepo/apps/api/src/template/seeds/seed-templates.ts](https://github.com/atloria-monorepo/apps/api/src/template/seeds/seed-templates.ts)

Seeds all document templates into the database.

This function creates or updates all predefined templates.

Templates are marked as public and system-created.

Signature

```
async function seedTemplates(prisma: PrismaClient, systemUserId: string): Promise<void>
```

Parameters

Name	Type
prisma	PrismaClient
systemUserId	string

Returns: Promise<void>
