segmentsMatch

Kind: Function

Source: `atloria-monorepo/apps/api/src/tours/tour-targeting.ts`

Segment filter: an experience with no required segments targets everyone; otherwise at least one declared visitor segment must intersect (case- and whitespace-insensitive).

Signature

```
function segmentsMatch(required: string[] | undefined | null, provided: string[] | undefined |
```

Parameters

Name	Type
<code>required</code>	<code>`string[]</code>
<code>provided</code>	<code>`string[]</code>

Returns: `boolean`
