shouldAutosubmit

Kind: Function

Source: [atloria-monorepo/libs/agent-core/src/benchmark/agent-hardening.ts](#)

Determine if we should extract and submit a partial patch.

Pattern from SWE-agent: On ANY non-success exit (timeout, max turns, cost limit, API error), submit whatever git diff exists. A partial fix is better than no submission.

Returns false if: task passed cleanly, or no changes exist.

Signature

```
function shouldAutosubmit(result: {
  passed?: boolean;
  timedOut?: boolean;
  hasChanges?: boolean;
  error?: string;
}): boolean
```

Parameters

Name	Type
result	{
passed?: boolean;	
timedOut?: boolean;	
hasChanges?: boolean;	
error?: string;	
}	

Returns: `boolean`
