statusChip

Kind: Function

Source: [atloria-monorepo/apps/web/src/components/change-requests/cr-shared.ts](https://github.com/atloria-monorepo/apps/web/src/components/change-requests/cr-shared.ts)

Status chip for a CR row. An 'open' CR with a populated conflictState is "needs review" — a merge attempt hit conflicts, not a failure.

Signature

```
function statusChip(cr: Pick<ChangeRequest, 'status' | 'conflictState'>): StatusChip
```

Parameters

Name	Type
cr	<code>Pick<ChangeRequest, 'status'></code>

Returns: `StatusChip`
