SubdomainPathPage

Kind: Function

Source: `atloria-monorepo/apps/web/src/app/subdomain/[slug]/[...path]/page.tsx`

Subdomain path handler for *.atloria.app/audience/document

Middleware rewrites myapp.atloria.app/developers/getting-started
→ /subdomain/myapp/developers/getting-started

Resolves slug → slugId, then redirects to /p/[slugId]/[...path]

Signature

```
async function SubdomainPathPage({ params }: SubdomainPathPageProps)
```
