titleSimilarity

Kind: Function

Source: `atloria-monorepo/libs/agent-core/src/memory/consolidator.ts`

Simple title similarity using normalized Levenshtein-like comparison.
For our use case (short titles < 80 chars), word overlap is sufficient.

Signature

```
function titleSimilarity(a: string, b: string): number
```

Parameters

Name	Type
<code>a</code>	<code>string</code>
<code>b</code>	<code>string</code>

Returns: `number`
