

transformSnapshotToDocSet

September 4, 2026

transformSnapshotToDocSet

Kind: Function

Source: `atloria-monorepo/apps/api/src/technical-docs/technical-docs-materializer.service.ts`

Pure transform: navMap + entities + relationships → category tree + entity reference pages. Deterministic (stable ordering, stable slug dedupe) so re-runs produce identical output for identical snapshots.

Signature

```
function transformSnapshotToDocSet(navMap: TechnicalNavMap, entities: SnapshotEntity[], relationships: SnapshotRelationship[], options: MaterializeOptions): TechnicalDocSet
```

Parameters

Name	Type
<code>navMap</code>	<code>TechnicalNavMap</code>
<code>entities</code>	<code>SnapshotEntity[]</code>
<code>relationships</code>	<code>SnapshotRelationship[]</code>
<code>options</code>	<code>MaterializeOptions</code>

Returns: `TechnicalDocSet`
