usePageTracking

Kind: Function

Source: [atloria-monorepo/apps/web/src/lib/analytics/usePageTracking.ts](#)

Hook to track page views with time on page and scroll depth

Best practices implemented:

- 1. Session-based tracking (browser session)
- 2. Time on page measurement
- 3. Scroll depth tracking
- 4. Debounced scroll events
- 5. Beacon API for reliable tracking on page unload
- 6. No PII collection (anonymous tracking)

Signature

```
function usePageTracking(options: PageTrackingOptions)
```

Parameters

Name	Type
options	PageTrackingOptions
