

validateVisibilityRule

September 4, 2026

validateVisibilityRule

Kind: Function

Source: `atloria-monorepo/apps/api/src/reader-access/visibility.util.ts`

Validate an owner-submitted rule (the admin PUT). Returns a list of problems; empty = valid. Depth/size-capped so a hostile payload can't be stored.

Signature

```
function validateVisibilityRule(rule: unknown, depth): string[]
```

Parameters

Name	Type
<code>rule</code>	<code>unknown</code>
<code>depth</code>	<code>any</code>

Returns: `string[]`
