

# withRetryWrapper

September 4, 2026

## withRetryWrapper

**Kind:** Function

**Source:** [atloria-monorepo/packages/doc-automation/src/v2/providers/retry.ts](https://github.com/atloria-monorepo/packages/doc-automation/src/v2/providers/retry.ts)

Create a retryable version of an async function

### Signature

```
function withRetryWrapper(fn: (...args: TArgs) => Promise<TResult>, config: RetryConfig): (...a
```

### Parameters

| Name   | Type                                                       |
|--------|------------------------------------------------------------|
| fn     | <code>(...args: TArgs) =&gt; Promise&lt;TResult&gt;</code> |
| config | <code>RetryConfig</code>                                   |

**Returns:** `(...args: TArgs) => Promise<TResult>`
