AgentStartPayload

Kind: Interface

Source: `atloria-monorepo/apps/api/src/agent/agent.types.ts`

Agent WebSocket Protocol Types

Defines the event contract between frontend and backend for real-time agent sessions. Mirrors the CLI experience over WebSocket.

Client → Server:

agent:start — Create a new session
agent:send — Send a message to the agent
agent:inject — Inject a message mid-task
agent:cancel — Cancel the current operation

Server → Client:

agent:thinking — Agent is processing
agent:tool_start — Tool call started
agent:tool_end — Tool call completed
agent:message — Agent text output (streamed or full)
agent:todo — Todo list updated
agent:turn_done — Turn completed with usage stats
agent:error — Error occurred
agent:ended — Session ended

Properties

Property	Type
<code>workspace</code>	<code>string</code>
<code>model</code>	<code>string</code>
<code>maxTurns</code>	<code>number</code>

Property	Type
projectId	string
organizationId	string
superMode	boolean
verbose	boolean
autonomous	boolean
testCommand	string
resumeSessionId	string
routingTable	`gpt54-family`
mode	import('@atloria/agent-core').TaskMode
