AuthoredDocs

Kind: Interface

Source: atloria-monorepo/libs/parser-core/src/openapi/doc-annotations.ts

What an author wrote about one operation, in whatever language they wrote it.

Absent means "the source said nothing here" — never "the source said nothing useful". The

distinction is what lets `mergeAuthoredDocs` layer a weak source under a strong one without

a blank field from the strong source erasing a real sentence from the weak one.

Properties

Property	Type
<code>summary</code>	<code>string</code>
<code>description</code>	<code>string</code>
<code>params</code>	<code>AuthoredParamDocs</code>
<code>responses</code>	<code>AuthoredResponseDoc[]</code>
<code>tags</code>	<code>string[]</code>
