Kind: Interface

Source: `atloria-monorepo/packages/tour-widget/src/player.ts`

Atloria Tour Player — the live-DOM guided-tour engine (unchanged behaviour from the original single-file widget; extracted so the D2 orchestrator can drive it alongside checklists / announcements / NPS). It resolves each step's REAL element (selector → xpath fallback), spotlights it and pins a tooltip.

D2 additions are surgical: an optional `hooks` bag lets the orchestrator observe lifecycle (started / step viewed / a missing element / completed / dismissed) for analytics — the rendering is untouched.

Properties

Property	Type
<code>order</code>	<code>number</code>
<code>action</code>	<code>`click`</code>
<code>selector</code>	<code>string</code>
<code>xpath</code>	<code>string</code>
<code>elementText</code>	<code>string</code>
<code>elementRole</code>	<code>string</code>
<code>url</code>	<code>string</code>
<code>boundingBox</code>	<code>{ x: number; y: number; w: number; h: number }</code>
<code>value</code>	<code>string</code>
<code>note</code>	<code>string</code>
