Azure OpenAI Embedding Adapter

Uses direct `fetch` calls to the Azure OpenAI embeddings endpoint.

Zero external dependencies — only Node.js global `fetch` (Node 18+).

Follows the same Azure API patterns as `runtime/model-adapter.ts`:

- `api-key` header authentication
- Deployment-based URL routing
- Rate limit (429) handling with `Retry-After` support
- Structured error propagation

Properties

Property	Type
<code>endpoint</code>	<code>string</code>
<code>apiKey</code>	<code>string</code>
<code>model</code>	<code>string</code>
<code>apiVersion</code>	<code>string</code>
<code>batchSize</code>	<code>number</code>
