## ExplorerStrings

**Kind:** Interface

**Source:** `atlوريا-monorepo/packages/ui-core/src/components/api-explorer/strings.ts`

Every reader-facing string in the API Explorer.

The component ships English defaults so an unconfigured host is unchanged, and the host overrides them with its own catalog — the reader site is EN + AR with RTL, and until now the explorer sat inside that shell speaking only English.

Flat and typed on purpose: a missing key is a compile error at the host, not a blank label discovered by a reader.

### Properties

| Property                      | Type                |
|-------------------------------|---------------------|
| <code>authOpenEndpoint</code> | <code>string</code> |
| <code>authNeeded</code>       | <code>string</code> |
| <code>authUsingYourKey</code> | <code>string</code> |
| <code>authUsingToken</code>   | <code>string</code> |
| <code>authGetKey</code>       | <code>string</code> |
| <code>authPasteToken</code>   | <code>string</code> |
| <code>authChange</code>       | <code>string</code> |
| <code>authTokenMasked</code>  | <code>string</code> |
| <code>authInherited</code>    | <code>string</code> |

| Property                     | Type   |
|------------------------------|--------|
| authInheritedNone            | string |
| authOverride                 | string |
| authBlockedSend              | string |
| auth0authNeeded              | string |
| auth0authSignIn              | string |
| auth0authSigningIn           | string |
| auth0authSignOut             | string |
| auth0authUsing               | string |
| auth0authScopes              | string |
| auth0authNoScopes            | string |
| auth0authMissingScope        | string |
| auth0authAddScope            | string |
| auth0authScopeBlockedSend    | string |
| auth0authExpired             | string |
| auth0authClientId            | string |
| auth0authClientIdHint        | string |
| auth0authDiscovering         | string |
| auth0authClientSecretRefused | string |
| auth0authPasswordRefused     | string |
| auth0authInsecureRefused     | string |
| auth0authNoPkceRefused       | string |
| auth0authUnavailable         | string |
| auth0authStateMismatch       | string |
| auth0authPkceUnavailable     | string |
| auth0authFailed              | string |
| collapsePanel                | string |
| expandPanel                  | string |
| resetLayout                  | string |

| Property         | Type   |
|------------------|--------|
| resizePanels     | string |
| explorerTitle    | string |
| authorize        | string |
| authorizeTitle   | string |
| request          | string |
| response         | string |
| code             | string |
| send             | string |
| sending          | string |
| copyUrl          | string |
| urlPlaceholder   | string |
| toggleLayout     | string |
| collapseResponse | string |
