ImageVariantSet

Kind: Interface

Source: atloria-monorepo/packages/doc-automation/src/v2/stages/stage-13-upload/upload.types.ts

D3 — one base image's responsive/zoom companion set, all as uploaded blob URLs. Stored on `Document.metadata.imageVariants` keyed by the DESKTOP blob URL (the URL the rendered markdown actually references, sans any `#atloria-annotations=` fragment) so the reader can join an `<img src>` to its variants without content parsing.

Properties

Property	Type
<code>desktop</code>	<code>string</code>
<code>tablet</code>	<code>string</code>
<code>mobile</code>	<code>string</code>
<code>crops</code>	<code>string[]</code>
