ProjectComplexity

Kind: Interface

Source: `atloria-monorepo/packages/doc-automation/src/v2/types/stage-05.types.ts`

Project complexity assessment for adaptive documentation generation.
Determines document count targets and category depth based on project characteristics.

Properties

Property	Type
<code>level</code>	<code>`simple`</code>
<code>score</code>	<code>number</code>
<code>factors</code>	<code>{</code>

```
featureCount: number;  
personaCount: number;  
chunkCount: number; // From stage 4 analyses  
topicCount: number; // Aggregated suggested topics  
avgComplexity: number; // Average chunk complexity score (1-3)
```

```
} | | recommendations | {  
targetDocuments: { min: number; max: number };  
categoryDepth: 1 | 2 | 3;  
topLevelCategories: { min: number; max: number };  
}` |
```
